Instructions

1. Apply a thick layer of glue to the top half of your collage tray. Cover with blue Shredded Tissue, pressing it down onto the glue to flatten it out. This will resemble the water in your ocean craft.
2. For the sand, tear light brown Tissue Paper into small, uneven pieces, approximately 2 inches in size.
3. In a disposable cup, mix equal parts glue and water. Using a sponge or paint brush, apply this mixture to the bottom half of the collage tray.
4. Cover the glue mixture with these tissue pieces. They should overlap each other, and they should overlap the "water" slightly. Now apply another layer of the glue mixture on top of the sand. This will set the Tissue Paper into place.
5. Print out the [PATTERN](#) of beach craft accessories. Cut out shapes, trace onto desired colors of craft foam and cut out. Glue the ball and umbrella onto the sand, and the boat onto the water.
6. These beach crafts wouldn't be complete without the addition of genuine looking sea shells! Glue Sea Shells onto the sand, allow your collage to dry, and then go impress your family and friends with not-just-another paper plate craft!
